

## **Terms of Service**

### **Mission Statement**

Abbeville Area Medical Center maintains compliance with the Payment Card Industry Data Security Standard (PCI DSS). The purpose of the Merchant Credit Card Policy is to protect our customers' credit card data and personal information shared for the sole purpose of settling amounts owed to the facility. Any information obtained will be used only for the purpose of processing credit card transactions and will not be retained.

### **Background**

PCI DSS was established by the credit card industry in response to an increase in identity theft and credit card fraud. Every merchant who handles credit card data is responsible for safeguarding that information and can be held liable for security compromises.

### **How Do We Secure Your Personal Information**

Here are some examples of security measures we use to protect your personal information:

Encryption technology, called Secure Sockets Layer (SSL), helps to protect personal information in certain areas of our websites during transport across the Internet. The presence of SSL encryption may be indicated by https in the browser URL or the image of a closed lock or solid key in the browser window. These indications may not be present in mobile services that use SSL.

For payment card information, we use secured networks

We recognize the importance of maintaining the security of our customers' personal information. We use reasonable security measures, including physical, administrative, and technical safeguards to protect your personal information.

AAMC may request a pre-authorization for transactions with a credit or debit card. This pre-authorization will not be billed to you; however, your card issuer may hold this amount for a short period. Your card issuer determines the length of time the pre-authorization is held. We do this to ensure that the card details are still valid and that you have sufficient funds to complete the transaction.

### **How Do We Share Your Personal Information**

We will not sell or rent your personal information. We will only use the information provided to settle your account. We do not retain any data. We may also use your personal information to support fraud prevention, or legal functions.
